

Optimize banking operations and drive growth

At a glance

Boost agility and profitability while reducing costs, empowering your employees, and protecting your data.

Streamline and automate your strategy to propel your financial organization forward

As digital transformation accelerates, your financial organization faces many challenges. Rising consumer expectations, cybersecurity threats, and regulatory compliance are only the tip of the iceberg. Meanwhile, disruptive forces such as economic pressures, fintech innovations, and open banking are transforming the industry rapidly.

To continue to grow and stay profitable in this ever-changing landscape, your financial organization needs to:

- Drive digital transformation to be more efficient, agile, and responsive.
- Empower your hybrid workforce to be productive from anywhere.
- Secure your data to meet evolving regulations and stay ahead of cyberthreats.

To achieve this, you need to move away from legacy systems and embrace a modern platform that enables you to quickly respond to new priorities.

omnissa™

Reduce cost and complexity to boost your bottom line

Legacy platforms just can't keep up with modern demands for scale, speed, and functionality. With the Omnissa Platform, you can process transactions faster, minimize downtime, and provide seamless banking to your customers. Virtualize apps and desktops to make management easier. Deliver seamless banking services and speed up help desk response times. Allocate resources more efficiently. Detect, fix, and troubleshoot performance issues fast. Omnissa helps you simplify as much as possible to cut costs, be more responsive to customer demands, and free your IT teams to focus on strategic growth.

Empower your bankers and brokers for greater productivity

Empower your team to excel by making desktops and apps accessible from anywhere. Enhance employee engagement and productivity by gaining meaningful insights and analyzing device and user behaviors. Your employees need to be agile, come together quickly, and address change fast. Uninterrupted services are the lifeblood of your business. With features like one-click resolutions and proactive alerts and management, you can support a strong business continuity plan and reduce remediation time from days to hours.

Reduce your risks and protect your financial data

For financial firms, safeguarding sensitive data is crucial. Our solutions offer centralized and secure app access, robust legacy app management, and comprehensive security features to bolster your business continuity plan. By reducing risk and ensuring adaptability, you can maintain security without sacrificing operational continuity. We enhance your resilience, allowing your customers to enjoy seamless service while minimizing the impacts of outages, disruptions, and security breaches.
