Increase efficiency and productivity for your financial institution

Navigate challenges and drive growth

Your financial organization faces many challenges. To success, you need to offer exceptional customer experiences while reducing costs and modernizing your systems. You also must protect customer data and empower your staff with easy, secure access to data and apps without constraints to boost efficiency and productivity.

Streamlined IT operations enable scalable, reliable, and cost-effective services without location limits. Data driven insights can keep your teams competitive. A zero trust model is crucial for strengthening security, ensuring compliance, lowering risk and adhering to regulatory requirements.

Your main goal is to grow and stay profitable. To achieve this, you need to move away from legacy systems and adopt modern solutions that enable you to quickly respond to new priorities.

omnissa™

Transform and stay resilient

Modernize for more efficacy

Upgrade your core banking system with our innovative solutions for more efficient and intelligent operations. Our technology helps you focus on strategic business growth. Customers now expect real-time processing and proactive service. Stay competitive by being quick and efficient in your internal processes. Legacy systems can't meet the modern needs of speed, scale, and functionality. It's time to replace and optimize your networks and systems. Our solutions make your IT operations smoother, scalable, agile, and reliable with automation and analytics.

Increase productivity

By embracing digital transformation, you can streamline operations, reduce manual tasks, and significantly improve customer satisfaction. Technology plays a pivotal role, automating processes that once required tedious manual input and providing intuitive user interfaces that simplify financial interactions. This approach not only enhances productivity but ensures that customers enjoy a more efficient experience with you. By focusing on innovation, we unlock new possibilities for the future of finance, making it more accessible and user-friendly for everyone involved. AI-driven insights and analytics allow for proactive remediation. Integrations with embedded remote support help keep employees efficient.

omnissa™

Protect financial data

Growth through secure transformation

You should be focusing on digital transformation that avoid disruptions and encourage growth. Our financial services solutions provide secure, remote access to critical systems and reduce siloes.

You also need to adopt flexible strategies with strong security to protect against data breaches. Our solutions enable you to keep your endpoints secure and ensure conditional access to applications and resources. Integrations with 3rd party security providers allow you to meet your Zero Trust goals and configure conditional access policies and risk scoring.

$6.08 million

The average cost of a data breach for the financial sector was 6.08 million in 2024.

omnissa™

Key success factors in digital banking

Financial organizations are continually seeking ways to create high-performance, reliable environments that simplify their employees' tasks and enhance customer service. Speed is paramount in the financial industry—speed to allocate resources, manage personnel and services, spot and fix issues, and adopt new technologies. Simplicity accelerates these processes.

Innovation

Cultivate innovation with advanced frameworks that facilitate swift adoption of new banking technologies and services.

Enhanced security

Deploy a Zero Trust model to fortify security and streamline compliance across mobile, applications, and cloud environments.

Data-driven insights

Utilize data analytics to make informed decisions and sustain a competitive advantage.

Customer experience

Provide round-the-clock, personalized services that elevate customer interactions at every touchpoint.

Streamlined operations

Deliver scalable, reliable, and cost-effective digital services regardless of location constraints.

Empowered staff

Equip bankers and staff with secure, easy access to financial data wherever needed, enhancing productivity and satisfaction.
