Secure, streamlined, mission-ready bundles for federal agencies

At a glance

Omnissa FedRAMP-authorized SaaS offerings deliver core Omnissa Workspace ONE® capabilities in streamlined, secure packages tailored for federal environments.

Meet compliance mandates and power workforce productivity

Accelerate your federal mission with Omnissa FedRAMP Essentials, a collection of flexible SaaS bundles for mobile, desktop, and experience management. These bundles can be deployed quickly, and feature modular licensing that allows you to select only the capabilities you need, eliminating unnecessary cost and complexity. The result is a lightweight, secure, and scalable platform that's optimized to meet the highest federal security and compliance standards for your agency's critical operations.

Highlights

- **FedRAMP-authorized SaaS offerings** are built to meet federal security and compliance standards.

- **Modular licensing** means you pay only for what you need.

- **Pre-defined bundles** can be deployed quickly to accelerate onboarding.

Choose the bundles to help power your agency forward

Powered by **Workspace ONE**, our Essentials bundles can help you strengthen your security posture while simultaneously enhancing **digital employee experience (DEX)** and productivity. Simplified licensing accelerates time-to-value, directly reducing operational overhead and support costs for a more efficient and secure government. Here's an overview of our offerings.

Workspace ONE Mobile Essentials

Achieve full lifecycle management for all your mobile devices.

- **Delivers secure, policy-based access and compliance enforcement** for all mobile devices, protecting sensitive federal data no matter the device type or ownership, including BYOD.

- **Streamlines device management, onboarding, and app updates,** allowing IT to efficiently scale support remotely and maintain a consistent, compliant mobile environment.

- **Provides real-time monitoring, conditional access, and remote wipe capabilities,** enabling rapid response to security incidents and minimizing risk to government assets.

Workspace ONE Desktop Essentials

Achieve full lifecycle management for all your desktop devices.

- **Centralizes management of Windows and macOS desktop devices,** with policy enforcement, real-time compliance checks, and automated security controls to protect sensitive data across federal IT environments.

- **Enables seamless access to critical apps for remote and office-based employees** through secure single sign-on (SSO), unified app catalogs, and zero-trust authentication, improving productivity and security.

- **Automates onboarding, patching, and lifecycle management,** reducing IT burden and ensuring continuous operations and compliance for mission-critical desktop systems.

Workspace ONE UEM Essentials

Adopt unified management for both mobile and desktop endpoints.

- **Delivers comprehensive endpoint security and management** for all devices, supporting policy enforcement, real-time compliance, and improved security across diverse device fleets.

- **Streamlines operations and security** via automated device onboarding, updates, and compliance checks, reducing vulnerabilities and supporting secure remote access.

- **Facilitates secure, seamless access to apps and resources from any device,** enhancing productivity and operational continuity in hybrid and remote environments.

Omnissa Mobile Analytics add-on

Gain real-time insights into mobile app performance, network events, and security incidents across diverse mobile environments.

- **Monitors and optimizes the mobile user experience,** supporting reliable access and compliance with security policies critical for sensitive operations.

- **Integrates with Workspace ONE UEM and Workspace ONE® Mobile Threat Defense** to reduce risks like phishing and device vulnerabilities while helping IT to maintain device compliance and enforce access controls aligned to federal standards.

Get started

Empower your agency with unmatched IT visibility, security, and resilience through advanced endpoint management, secure virtual desktops, and real-time insights. Visit our **federal webpage** or reach out to a **federal sales rep** today.
