

Revolutionize IT operations with DEX for Omnissa Horizon

Work has changed. Today's organizations need tech solutions that are secure, high-performing, and user-focused. Digital employee experience (DEX) for Omnissa Horizon® can help your IT teams manage virtual desktops and apps seamlessly, drive productivity, and enhance engagement.

DEX for Horizon is a solution that includes products like **Omnissa Intelligence** for Horizon and **Experience Management** for Horizon. This powerful combination helps transform virtual desktop and app management by providing a single platform for delivering, analyzing, and optimizing digital work environments. With intelligent insights, real-time support tools, and seamless workflow orchestration, DEX for Horizon can help your organization significantly reduce costs, save time, and keep employees productive and satisfied.

What can DEX for Horizon help you do?

- Optimize app performance.
- Speed up login times.
- Measure experience scores across devices.
- Automate resolution.
- Extend app lifecycles.
- Improve resource allocation.
- Remote desktop session host (RDSH) app experience.

omnissa™

At a glance

Keep employees productive and engaged with a single platform for managing and optimizing the performance of physical and virtual endpoints.

Transform the workspace

DEX for Horizon helps your team deliver, measure, analyze, and remediate (DMAR). Track app performance, monitor experience scores, and save time and money while boosting employee productivity.

Gain insights with dashboards and reports

Provide IT with a unified platform to deliver, measure, analyze, and improve digital work experiences across physical and virtual devices. Custom dashboards, actionable insights, and end-to-end visibility help foster smarter decision-making.

Save time, cut costs

Get real-time insights and proactively identify issues across your VDI workspace with Experience Management for Horizon. Identify root causes, optimize resource allocation with app telemetry, and receive instant notifications via **Omnissa Freestyle Orchestrator** to quickly address app crashes and high resource consumption.

Deliver reliable access to critical apps

Empower help desk staff to launch real-time remote support sessions through the Horizon Universal Console, enhancing employee engagement and experience with seamless, native integration.

Advanced features and capabilities

Experience Management for Horizon

Measure and analyze performance metrics, optimize resource use, and identify root causes of app or network issues with integrated telemetry.

Freestyle Orchestrator

Automate workflows and trigger real-time notifications for proactive IT actions, helping to ensure quick resolutions to any performance hiccups.

Last mile telemetry

Collect Wi-Fi strength, SSID, and BSSID so admins can solve problems like network latency and pinpoint which access point is having a signal issue.
